

HomeCare Alert Starter Kit

– with network and expansion options

The HomeCare Kit is a system of support devices used to provide alert or alarm indication within the home. This alert/alarm indication can be indicated through visual and audible devices to warn carers or family members that someone is in need of assistance. This alert can be distributed through the home as well as presented on other devices outside the home such as, SMS to mobile phone, email alert, message to pocket pagers, digital signs, sirens etcetera. The HomeCare Starter Kit comes with all the equipment and instructions required to be installed without any fuss. If you need help with the installation, this can be arranged by PACTechnika also. The Kit can come with call points, pullcords, wireless pendants, wireless buttons, overdoor lights, remote indicators, integration with 3rd party systems and networked for ease of expansion or remote indication.

System Standard Features
