

Alarm Paging Module - APM

c/w TAP Out, Kirk/Spectralink Out, SMS Out, Scope In.

The Alarm Paging Module (APM) is a standalone paging appliance that comes with 4 inputs as standard in either opto-coupled or dry contact configuration. The unit can be upgraded to 16 inputs in total. These inputs can be used to send messages to pagers via the inbuilt transmitter, control relays, wireless handsets, SMS to mobile phones or directly to TAP devices.

Features

- 4/8/12 or 16 OPTO or CC inputs
- POCSAG, SMS, TAP, KIRK/SPECTRALINK
- Inbuilt synthesized transmitter
- 4x recipients per alarm input
- External LED Indicators
- 19" Rack Enclosure
- Mains Powered

Specifications

- Frequencies Available:
 - VHF 148-174MHz.
 - UHF 440-470MHz.
 - Synthesized
 - Configurable from 1-5 watts
- Signal Format : POCSAG 512,1200,2400
- Alarm Capacity – 4/8/12/16
 - Inputs in OPTO or CC
 - 4x recipients per input
- Alarm Programming :
 - NO, NC, State Change, Disabled programming
 - Initial Delay : 65535 sec. max
 - Escalation delay : 65535 sec. max
 - Escalation Repeats : 255 max
 - Escalation Output : POCSAG + any one additional protocol per step
- Dimensions : 19" rack case, 439x205x44mm
- Weight : 2.7kg
- Power Supply : 110-240vac 50/60Hz max via IEC socket.
- Antenna Connector : N-Type 50 ohm
- Alarm Input Connector : 4x 8 way pluggable terminal block
- Approvals : CE, C-tick, IC, FCC, RCM, RoHS, EN60950

System Solutions
