

## *Fusion Enterprise*

*- Event Management Software for 64 Bit OS*

*Fusion Enterprise is the next evolution of the trusted Fusion Series product range. Fusion Enterprise is a software platform that runs on 64-bit Windows/Linux servers, VMware/Hyper-V virtual machines or hosted on cloud service providers such as Amazon/Azure.*

*Fusion Enterprise can handle the most demanding workloads including casino customers, large hospitals, airports, factories, industrial sites or entire buildings and IT Data Centres. Easily configure hundreds of different connected inputs and output devices as well as over 1 million users and recipients. Fusion Enterprise monitors all your onsite systems and distribute alerts automatically to the appropriate personnel as critical events occur. Fusion Enterprise can be used to monitor anything including fire and security alarms, PLC and automation, air conditioning and cooling systems, toxic gas sensors, building management, access control, patient monitoring and nurse call, UPS, Casino gaming systems, IT network devices and servers or any other onsite device.*

*Staff can also send messages manually via the secure web interface. Improve staff performance and customer satisfaction with real time two-way messaging to almost any wired or wireless device including smart phone push notifications, 4G text messaging, e-mail, Wi-Fi/DECT/Walkie Talkie handsets, low-cost pagers, LED Signs, HDMI Monitors, Audio Systems, Access Control, CCTV, BMS and more...*

*Fusion Enterprise can utilize a new or existing Fusion EMM or Fusion Pro network appliance to provide connectivity for all legacy inputs and outputs such as connection to paging transmitters, SMS modems, alarm inputs and RS232 serial devices. The Fusion Enterprise system then handles all the demanding tasks such as user connectivity, SSL web servers, databases, IP integrations, messaging, reporting, statistics, dashboards, redundancy, backups and logging and more..*

## Fusion Enterprise

- Event Management Software for 64 Bit OS

### System Features/Options

- 64 Bit Application Software
- Install on Windows or Linux OS
- Install on VMware / Hyper-V Virtual Machines
- Install on hosted Cloud Services such as Amazon / Azure
- Create millions of users and recipients
- Install on Server, Cloud, PC, NUC, Embedded hardware
- Serial Ports only limited by hardware
- IP Ports only limited by hardware
- Gateways only limited by hardware

### System Input /Output Protocol

- POCSAG
- TAP/PET
- ESPA
- Scope
- Nurse Call Systems
- Fire Indicator Panels
- Building Management Systems
- Wireless Systems
- Telephony Systems
- RTLS
- Relay Output Modules
- Audio Systems
- Advanced High-Level Interfaces

### System Solutions

- ✓ Large Casinos
- ✓ Large Private / Public Hospitals
- ✓ Large Airports

- ✓ Large Factories / Industrial Sites
- ✓ Large Buildings
- ✓ IT Data Centres
- ✓ Operating Theatres
- ✓ Large Nursing Homes
- ✓ Large sites with Independent Living Units
- ✓ Hotels / Motels
- ✓ Access Control
- ✓ Police Stations
- ✓ Government Buildings
- ✓ Defence Facilities
- ✓ Council Building/Grounds
- ✓ Clinics / Surgeries
- ✓ Treatment Centres
- ✓ Residential Homes (Home Care)
- ✓ Respite Centres
- ✓ Leisure Centres
- ✓ Interview Rooms

### Description [Part Numbers]

**Fusion Enterprise**.....[50-9600]

- c/w Installation Software (Windows or Linux application), 10 Users, 100 Recipients, Web Messaging, Reminders, (Requires Server/PC, not Included).

**Fusion Enterprise Appliance**.....[50-9800]

- c/w Rack Mount Appliance, 6 COM Ports, 2x NIC, USB Ports, 240G SSD, 16G RAM, Win10 Pro or MS Server or Ubuntu.
